

D6568F

Waterproof Passive Subwoofer

Description

The D6568F is a waterproof passive subwoofer built for professional use in venues, conferences, mobile events, and public areas such as squares and shopping centers, designed to withstand water exposure. It is equipped with two 18-inch woofers arranged in a "V" shape for improved sensitivity and deep bass output. Featuring all-weather construction, it offers a frequency response of 35 Hz - 300 Hz, a sensitivity of 106±2dB, and a rated power of 1200W, providing versatile and robust low-frequency support for premium entertainment venues.

Features

- All-weather design, dual 18-inch high-power, long-stroke woofers with high SPL;
- The two woofers are arranged in a "V" shape and the rear cavity reflects to output a highly sensitive, deep and powerful low frequency;
- High low-frequency rate, rich flexibility and strength, suitable for low frequency supplementation in high-end KTV, nightclubs, bars and other entertainment venues
