# D7632R D7632Z DG1300H D7632D

Projection Applicator

Description

D7632R/D7632Z/DG1300H/D7632D Intelligent Paperless Conference Projection Applicator is a network-based fully digital audiovisual decoding device based on TCP/IP transmission protocol. It can be installed in the conference room where the large screen is located and connected to the large screen device in the conference room. It can support multiple participants to project at the same time, and the applied speech content screen can be automatically pushed to the large screen in the conference room for display, or it can be projected after being managed by the secretary terminal. The secretary of the conference can also select the corresponding promotional video and music for projection playback according to the requirements of the unit. It provides users with a more convenient and reliable conference experience.
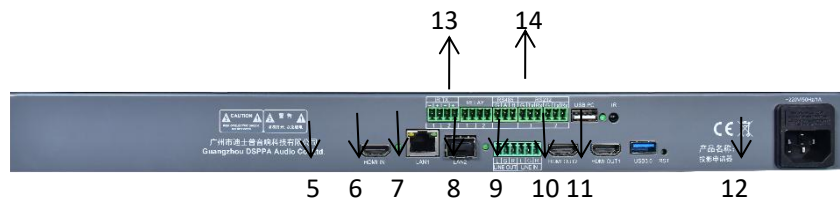

Features

- With low power consumption and high efficiency design, safe, stable and reliable.
- Support up to 4 users to apply for projection.
- Output resolution: 1920*1080.
- 1-channel dual-channel audio input, 1-channel dual-channel audio output, Phoenix socket.
- Input interfaces: DC*1, RJ45*1, USB2.0*2.
- Output interface HDMI*1 (connected to the large screen).

Front / Rear Panel

Projection Applicator (Front Panel)

Projection Applicator (Rear Panel)

1. Power Button

The power button of the machine.

2. USB2.0

Used for device upgrade.

3. LED Indicators

Power, network, and working indicators.

4. LCD Screen

Display the device model, IP and version number.

5. HDMI IN

Video input interface.

6. LAN Network Interface

Gigabit network interface.

7. LAN2 Network Interface

Optical interface.

8. LINE IN/OUT

Audio input and output interfaces.

9. HDMI OUT2

Signal output interface 2 (reserved).

10. HDMI OUT1

Signal output interface 1.

11. USB3.0

Used for device upgrade.

12. Power Supply

Support 220V power supply input.

13. Central Control

Used to control the control interface of the central control.

14. USB PC

Used for device upgrade.

System Architecture

DSPPA Intelligent Paperless Conference System Topology

The intelligent paperless projection applicator is connected to the large conference screen, and all participants can project the speech content to the large screen for display according to their needs through the paperless conference terminal.
