

DA-BW600-Y11

Professional Oil-Based Haze Machine

Description

This non-heated haze machine adopts ultra-efficient and stable air compression technology, producing a large volume of fine and lightweight haze instantly upon power-on, with adjustable output angle and airflow, quiet operation, intelligent safety shutdown when the nozzle cover is closed, and built-in DMX control for convenient remote operation.

Features

- Soft and ultra-fine haze with rapid dispersion
- Adjustable output angle and airflow for flexible and comfortable operation
- No heating or warm-up required—instant operation with quiet and faster haze output
- Intelligent safety design: the machine automatically stops when the nozzle cover is closed
- Built-in DMX control system for convenient remote operation

Specifications

Model	DA-BW600-Y11
Rated Voltage	AC220-230V or AC110-120V, 50/60Hz
Rated Power	530W
Fuse	5A/250V (220V) 10A/250V (120V)
Haze Output Adjustment	Not Supported
Haze Output Volume	3000Cu ft/min

Continuous Output Capability	Yes
Fluid Consumption	Approx. 22 hours/L
Fluid Tank Capability	3.2L
Fan Speed Adjustment	Supported, 0–100%
Fan Direction Adjustment	Supported
Manual Control Mode (Built-in)	Digital Display Panel
Included Controller	W-1 & W-2 Self-Locking Remote Kits
Control Protocol	DMX512
DMX Channels	2CH
DMX Input / Output	3-Pin XLR
Net Weight	27.9kg
Gross Weight	28.6kg
Machine Dimensions	500×370×410mm
Package Dimenisons	520×390×440mm

Front / Rear Panel

1. Haze Outlet (Fluid Filling Port)
2. Fluid Level Window
3. Power Socket
4. Power Switch
5. Digital Display Panel
6. 3-Pin XLR Connector
7. S5 Pin Connector
8. Antenna – 天线
9. Dust Filter
10. Fan
