

DT20 IP-USB Adapter

Description

DT20 IP-to-USB Audio Adapter features advanced technology, outstanding performance, and refined craftsmanship. With driver-free installation, it enables seamless connection of computers to IP audio networks and works with various audio applications for playback and recording, making it ideal for conference rooms and presentation applications.

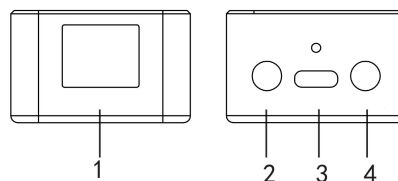

Features

- IP audio network to USB audio signal conversion for easy PC integration.
- Driver-free installation with plug-and-play operation.
- Compatible with mainstream audio applications for playback and recording.
- Ultra-low latency of less than 5ms for reliable audio transmission.

Specifications

Model	DT20
IP Module	Integrated
Device Latency	<5ms
Ethernet Port	100M
Connection Interfaces	RJ45, USB
Power Supply	USB 5V

Front / Rear Panel

1. LAN: Converts network signals to USB signals
2. AUX-OUT: Connects to the AUX-OUT of the omnidirectional microphone
3. USB: Connects to a PC
4. AUX-IN: Connects to the AUX-IN of the omnidirectional microphone
