

PL206S

Passive Line Array Subwoofer

Description

The PL206S is a high-performance subwoofer designed to complement line array systems, providing deep, punchy low-frequency output from 50 Hz to 300 Hz. Featuring a powerful 15" long-excursion woofer, it delivers high SPL and dynamic impact, while its robust construction and straightforward installation make it perfect for auditoriums, conference halls, and other indoor spaces requiring extended low-frequency coverage.

Features

- Equipped with a high-power 15" long-excursion woofer, delivering fast low-frequency response with rich punch and dynamic impact.
- The cabinet is made of professional-grade high-density plywood and coated with durable polyurea paint, suitable for a variety of indoor venues such as auditoriums and multifunctional conference rooms.
- Both sides of the cabinet are fitted with a quick-angle adjustment mechanism, allowing multiple units to be easily hung or stacked to form continuous wave coverage, achieving long-distance and uniform sound field propagation.

Specifications

| Model | PL206S |
|---|----------------------|
| System Configuration | 1x15" LF |
| Frequency Response ($\pm 3\text{dB}$) | 50Hz–300Hz |
| Sensitivity | 95 $\pm 2\text{dB}$ |
| MAX. SPL. | 123 $\pm 2\text{dB}$ |
| Input Impedance | 8 Ω |
| Rated Power | 600W |
| Dimensions (H×W×D) | 446×570×500mm |
| Weight | 32kg |
