

## PL208S

### Passive Line Array Subwoofer

#### Description

The PL208S is a high-performance subwoofer designed to complement line-array systems, delivering deep, punchy bass from 45 Hz to 250 Hz. Equipped with 1×18" long-excursion woofer, it offers 800 W rated power and a maximum SPL of 125 dB, ensuring fast, dynamic low frequencies with excellent impact and clarity. Its robust cabinet and user-friendly design make it ideal for auditoriums, multi-purpose halls, and other venues requiring extended low-frequency coverage.

#### Features

- Features a high-power 18-inch long-excursion woofer, delivering fast, deep and powerful low-frequency performance with excellent punch and impact.
- The cabinet is made of professional-grade high-density plywood and finished with a wear-resistant polyurea coating, making it suitable for various indoor venues such as auditoriums and multifunction halls.
- Quick angle-adjustment mechanisms on both sides of the cabinet enable fast flying or stacking of multiple units, forming continuous array coverage for long-distance and uniform sound distribution.

#### Specifications

Model	PL208S
System Configuration	1×18" LF
Frequency Response (±3dB)	45Hz–250Hz
Sensitivity	96±2dB
MAX. SPL	125±2dB
Input Impedance	8Ω
Rated Power	800W
Dimensions (H×W×D)	539×655×650mm
Weight	45kg
