DSPPA Conference Systems

1 System Introduction

D7101 Network Series

Based on the ARM9 embedded system platform, using high-performance DSP digital audio processing technology and high-fidelity line design for wired conference mic connection, the D7101 Series **IP Network Conference System** supports 5G WiFi wireless conference mics to achieve digital and visualized all-round conference system. The system features discussion and speech, voting, meeting sign-in, electronic desktop nameplate, teleconference, automatic camera tracking, and full conference recording. Besides, it can support PC-based software remote conference control, and Android tablet wireless control. The system includes 3 connection methods for wired and wireless mics: **1. pure wired mic connection; 2. pure wireless mic connection; 3. wired and wireless mics hybrid connection.**

The wired conference mics in the system are connected with a shielded CAT5 or CAT6 network cable, and the wireless conference mics are connected by 5G WiFi for encrypted wireless connection, which is characterized by simple installation, convenient construction, safety and reliability, and strong anti-interference ability.

Network Conference System Highlight Functions

Network Conference System Highlight Functions

■ Conference speech discussion, sign-in, and voting functions

The chairman mic has priority to speak, and supports 4 conference speaking modes: first-in first-out mode, normal mode, free mode and application mode. The participant can vote through the conference mic with voting function.

■ System recording and camera tracking

Insert a USB flash disk into the host D7101 to record the whole conference audio for easy archiving.

Connected with the digital conference system to achieve camera tracking, which can provide close-up of the speakers.

■ Support TCP/IP protocol, RJ45 interface for wired connection and 5G WiFi for encrypted wireless connection.

The system can be connected to a PoE network switch to expand up to 4096 wired conference mics, while the wireless mic adopts 128-bit AES encryption technology to expand up to 300 wireless conference mics through the 5G WiFi encrypting router.

■ With hot backup function for the host

Set one conference host as the host, and the other conference host as the backup machine (slave), and connect them to the system. When the host fails, the slave will be automatically enabled.

■ Internal two-way call

The system has an internal call function, which can realize two-way communication among the chairman, delegate, interpreter and operator (only for wired mcs with 5" condenser touch LCD screen).

■ Video Seamless Switch System D6108

The D6108 video matrix system can switch any camera video signals and video conference terminal signals to the corresponding display terminals as needed to ensure the orderly progress of the conference. It adopts a matrix signal switcher seamless switching of various video signal sources to achieve lossless signal transmission.

DSPPA Conference Systems

Product Features

D7101 Network Conference System Host

Features:

- Distributed conference system, network protocol transmission (PCS Stream).
- Integrated with translation, discussion, sign-in, vote, electronic nameplate and other functions.
- Support up to 4096 conference microphones.
- With a 4.3-inch resistance screen for the host.
- With 5 speech modes: FIFO, NORMAL, VOICE, FREE, APPLY. Support up to 6 mics at the same time.
- Can edit the participant information for mics.
- With the main and standby switching function for the host.
- Can be connected with 5G WiFi for wireless conference system.
- Support remote program upgrading.

Note: Host Installation Precautions

1. The host D7101 can connect the wired conference mic and the 5G WiFi wireless conference mic at the same time.
2. The number of wired conference mics can be expanded to 4096, and the number of wireless conference mics can be expanded to 300.
3. The D7101 series is connected to the conference mic through a PoE network switch. Each conference mic is equipped with a 2M professional network cable and an RJ45 connector.

D7121 Desktop Network Conference Chairman Mic with Voting

D7122 Desktop Network Conference Delegate Mic with Voting

D7121 Chairman MIC

D7122 Delegate MIC

Gooseneck Rod

Features:

- Adopt the network protocol transmission, without compression.
- Powered by POE Switch (Phantom +48V).
- With a 2.42-inch OLED screen display.
- With audio output interface and volume adjustment.
- Connected via a network (Cat-5/6) cable.
- With priority function for the chairman mic.
- With built-in LCD screen to display information, such as MIC ID, voting result, sign-in number, etc.
- With built-in 1.5W speaker unit.
- With 3.5mm headphone jack.
- **With 2m Cat-5/6 cable with a RJ45 jack connector.**

D7123 Desktop Network Conference Chairman Mic

D7124 Desktop Network Conference Delegate Mic

D7123 Chairman MIC D7124 Delegate MIC

Features:

- Adopt the network protocol transmission, without compression.
- Powered by POE Switch (Phantom +48V).
- With a 2.42-inch OLED screen display.
- With audio output interface and volume adjustment.
- Connected via a network (Cat-5/6) cable.
- With priority function for the chairman mic.
- With built-in LCD screen to display information, such as MIC ID.
- With built-in 1.5W speaker unit.
- With 3.5mm headphone jack.
- **With 2m Cat-5/6 cable with a RJ45 jack connector.**

Gooseneck Rod

D7125 Desktop Network Conference Chairman Mic with Voting

D7126 Desktop Network Conference Delegate Mic with Voting

D7125 Chairman MIC

D7126 Delegate MIC

Features:

- Adopt the network protocol transmission, without compression.
- Powered by POE Switch (Phantom +48V).
- With a 2.9-inch LCD screen display.
- With audio output interface and volume adjustment.
- Connected via a network (Cat-5/6) cable.
- With priority function for the chairman mic.
- With built-in 1.5W speaker unit.
- With 3.5mm headphone jack.
- **With 2m Cat-5/6 cable with a RJ45 jack connector.**
- With built-in LCD screen to display information, such as MIC ID, voting result, sign-in number, etc.

D7127 Desktop Network Conference Chairman Mic

D7128 Desktop Network Conference Delegate Mic

D7127 Chairman MIC

D7128 Delegate MIC

Gooseneck Rod

Features:

- Adopt the network protocol transmission, without compression.
- Powered by POE Switch (Phantom +48V).
- With a 2.9-inch LCD screen display.
- With audio output interface and volume adjustment.
- Connected via a network (Cat-5/6) cable.
- With priority function for the chairman mic.
- With built-in LCD screen to display information, such as MIC ID.
- With built-in 1.5W speaker unit.
- With 3.5mm headphone jack.
- **With 2m Cat-5/6 cable with a RJ45 jack connector.**

D7125Z Desktop Network Conference Chairman Mic with Voting & Nameplate

D7126Z Desktop Network Conference Delegate Mic with Voting & Nameplate

D7125Z Chairman MIC

D7126Z Delegate MIC

Nameplate

Features:

- Adopt the network protocol transmission, without compression.
- Powered by POE Switch (Phantom +48V).
- With a 2.9-inch LCD screen display.
- With audio output interface and volume adjustment.
- Connected via a network (Cat-5/6) cable.
- With priority function for the chairman mic.
- With built-in LCD screen to display information, such as MIC ID, voting result, sign-in number, etc.
- With built-in 1.5W speaker unit.
- With 3.5mm headphone jack.
- **With 2m Cat-5/6 cable with a RJ45 jack connector.**
- **With 3.9-inch LCD nameplate.**
- **Can edit the participant information and background.**

D7127Z Desktop Network Conference Chairman Mic with Nameplate

D7128Z Desktop Network Conference Delegate Mic with Nameplate

D7127Z Chairman MIC

D7128Z Delegate MIC

Nameplate

Features:

- Adopt the network protocol transmission, without compression.
- Powered by POE Switch (Phantom +48V).
- With a 2.9-inch LCD screen display.
- With audio output interface and volume adjustment.
- Connected via a network (Cat-5/6) cable.
- With priority function for the chairman mic.
- With built-in LCD screen to display information, such as MIC ID.
- With built-in 1.5W speaker unit.
- With 3.5mm headphone jack.
- **With 2m Cat-5/6 cable with a RJ45 jack connector.**
- **With 3.9-inch LCD nameplate.**
- **Can edit the participant information and background.**

D6284 High Definition Camera

Features:

- 2.14 megapixel; 1/2.8 inch CMOS sensor.
- Support H.265 and H.264 network video encoding.
- Support full HD 1080P60 video output.
- Support 3G-SDI and HDMI HD video output. 20x optical zoom, maximum wide angle 59.5° ; 12x optical zoom, maximum wide angle 72.5° .
- Support dual stream, and support multi-level video quality configuration.
- Support 1-channel audio input and 1-channel audio output.
- Support MAX. 64G TF card for local storage.
- Precise driving system, with accurate positioning and stable operation.
- Support multiple protocols and control interfaces, support daisy-chain networking.
- With a multi-functional IR remote controller.
- With built-in Chinese&English operation menu.
- With smart AE technology to effectively avoid the interference of complicated lights from projectors, TVs, etc.
- Support desktop/ceiling/wall mount installation.

Conference MIC Rod

Features:

D626C: Length=415mm
Black

- Used in the Mic units of D62 Series.
- Intelligent Conference System.
- Cardioid condenser microphone .
- High density 5-pin interface.
- Two-color (red/green) indicator.
- Length: 415mm.

D7286 Square MIC Rod
Length=186mm

- Cardioid directivity condenser microphone.
- High-density 5-pin aviation interface.
- With two-color (red/green) opening and working indicator.
- Length: 186mm.
- If there is no special requirement, D7286 is provided.

**Conference Management Software
Introduction**

D7100 Conference Management Software

The supporting conference management software of the full digital IP conference system is full-featured. After the computer running this management software is connected to the full digital conference system through a network cable, all information of the conference system can be displayed on the interface of the management software, where you can set the information for the conference, such as mic settings, voting, voting statistics, etc. Generally speaking, the venue management personnel can fully control and manage the venue through this control software.

After installing the software, you are required to do the following steps: 1. Set the network first for host connection. 2. Register. 3. Login. As shown below:

Network setting

NetLinkSet

Host NetSetting:

IP: 192 . 168 . 199 . 230

Port: 8001

Slave network setting:

IP: 192 . 168 . 199 . 231

Port: 8000

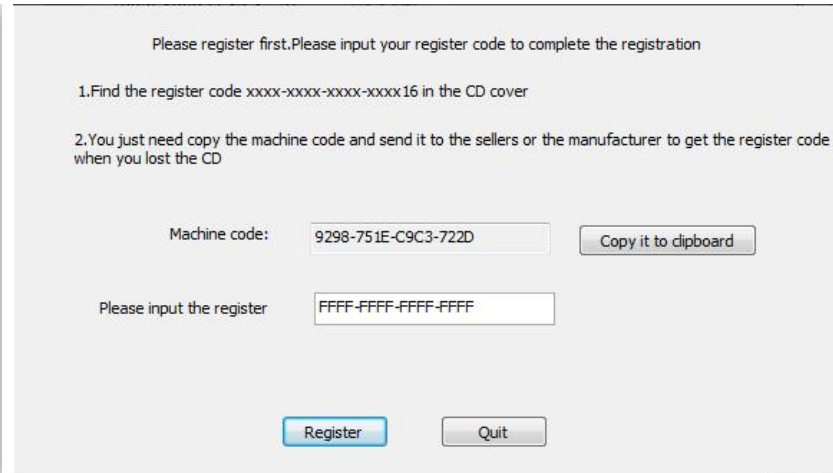

☐ Use Cloud

User:

PWD:

Yes Cancel

1. Set the network first for host connection.

Please register first. Please input your register code to complete the registration

1. Find the register code xxxx-xxxx-xxxx-xxxx16 in the CD cover

2. You just need copy the machine code and send it to the sellers or the manufacturer to get the register code when you lost the CD

Machine code: 9298-751E-C9C3-722D Copy it to clipboard

Please input the register: FFFF-FFFF-FFFF-FFFF

Register Quit

2. Register

User Name: admin

Password:

Network settings Login Quit

3. Login

The default user name is admin, and the password is 123456.

D7100 Conference Management Software

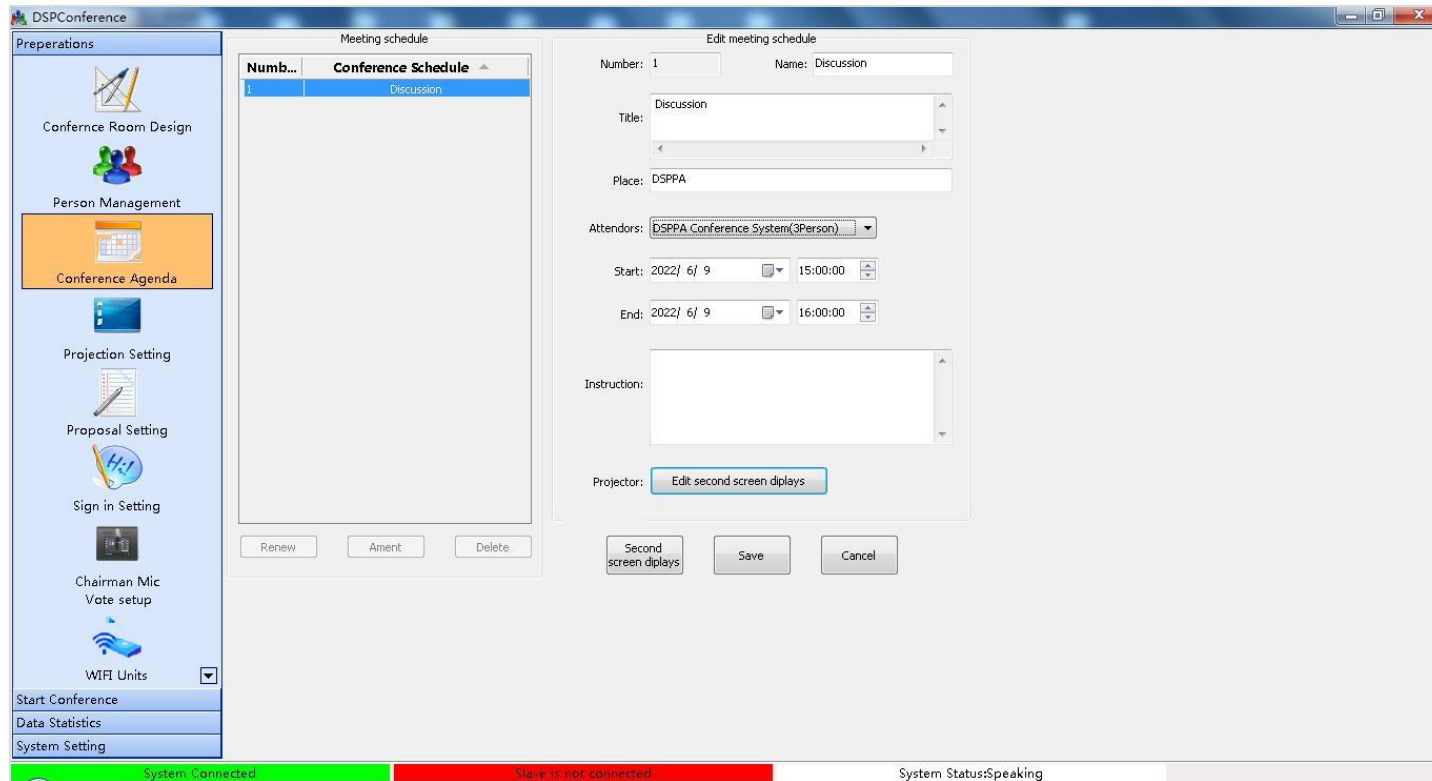

After successful login, you will enter the interface as shown below.

As the basic setting module, the Preparations includes Conference Room Design, Person Management, Conference Agenda, Proposal Setting, Sign-in Setting and Chairman Mic Vote Setup and other functions. The settings of the Preparations module must be completed before the meeting starts.

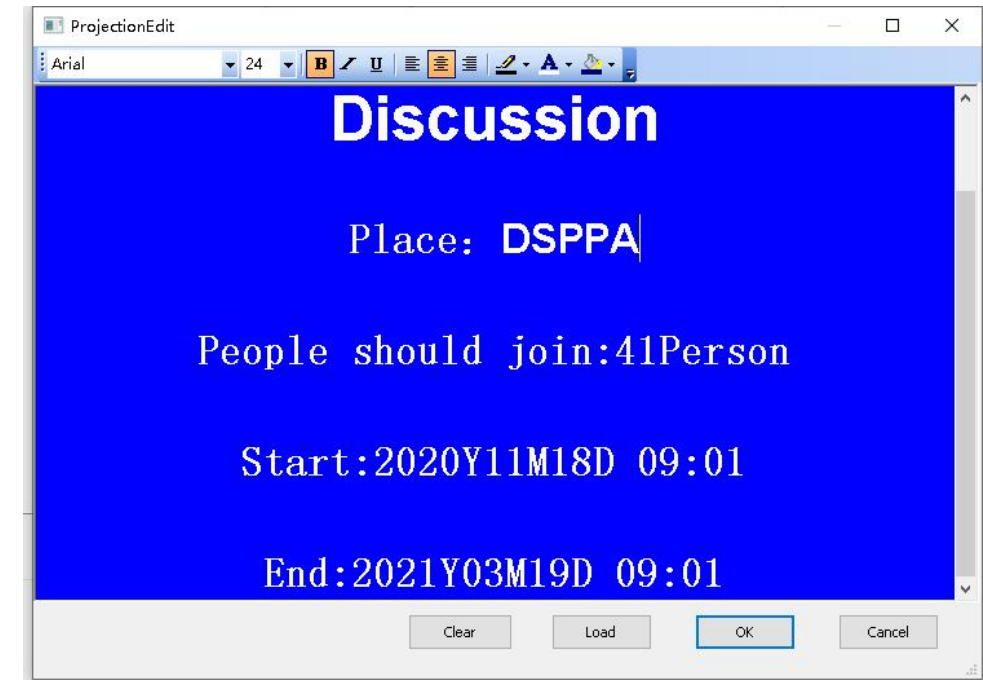

D7100 Conference Management Software

Conference Agenda belongs to the category of meeting information management, including the agenda setting before a meeting and the information storage management after a meeting. The contents that need to be set in the Conference Agenda include conference name, conference title, conference venue, participants (select the local or cloud personnel plan), conference start time and end time, brief introduction to the conference, etc.

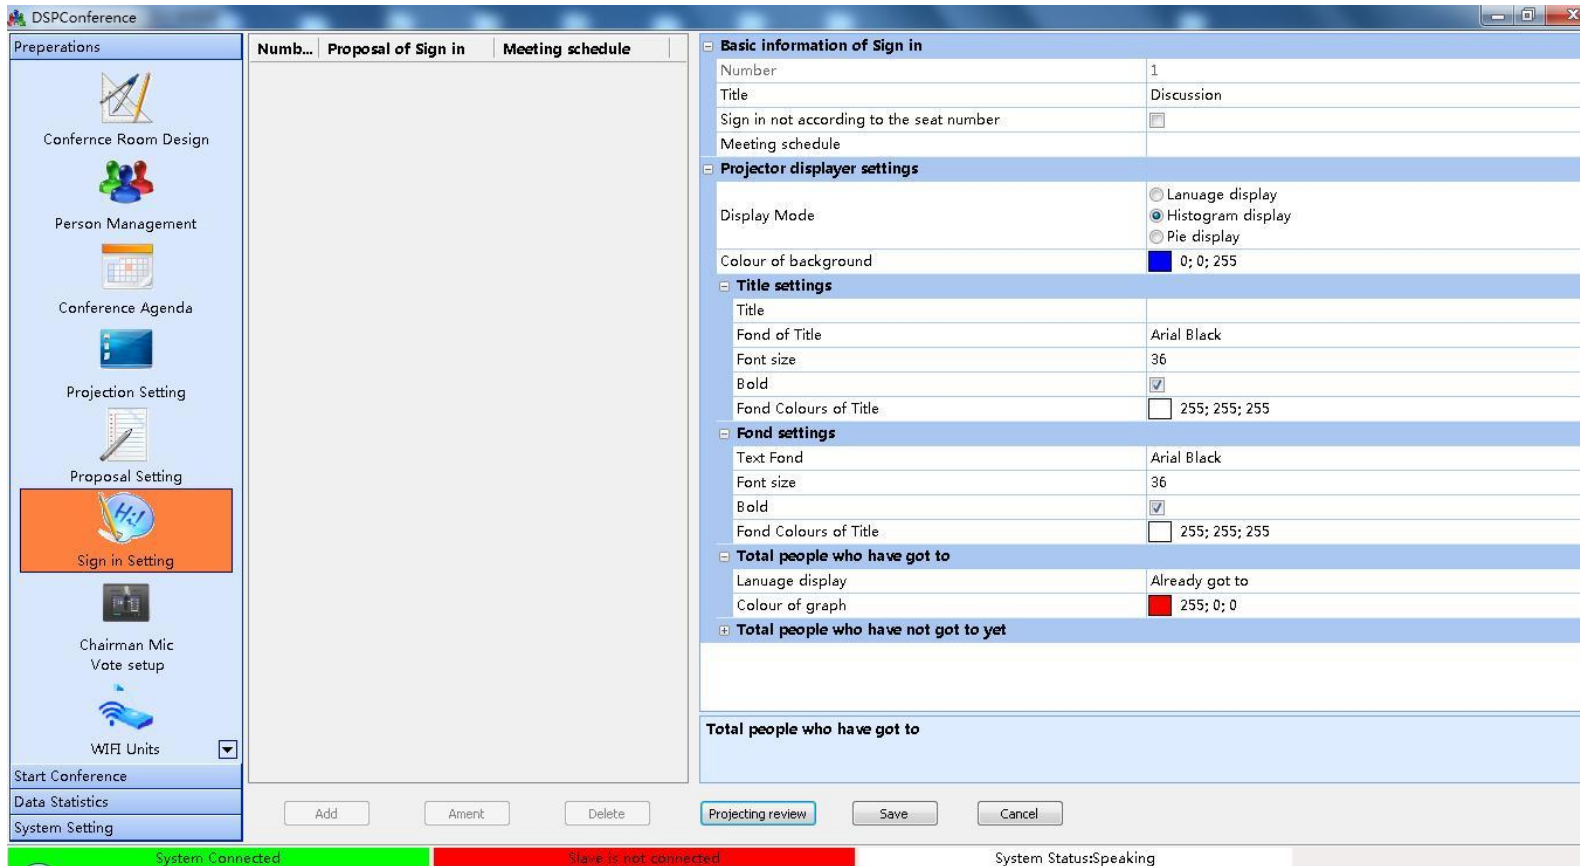

The screenshot displays the DSPConference software interface. On the left is a vertical sidebar with icons for various functions: Conference Room Design, Person Management, Conference Agenda (highlighted in orange), Projection Setting, Proposal Setting, Sign in Setting, Chairman Mic, Vote setup, and WIFI Units. Below these are buttons for Start Conference, Data Statistics, and System Setting. The main area is divided into two panes. The left pane, titled 'Meeting schedule', shows a table with one entry: 'Discussion'. The right pane, titled 'Edit meeting schedule', contains form fields for Number (1), Name (Discussion), Title (Discussion), Place (DSPPA), Attendors (DSPPA Conference System(3Person)), Start time (2022/ 6/ 9 15:00:00), End time (2022/ 6/ 9 16:00:00), and Instruction. At the bottom of the right pane is a 'Projector' button labeled 'Edit second screen displays'. At the bottom of the main area are buttons for Renew, Amend, Delete, Second screen displays, Save, and Cancel. A status bar at the very bottom shows 'System Connected' (green), 'Slave is not connected' (red), and 'System Status:Speaking'.

The screenshot shows the ProjectionEdit window, which is a text editor for creating a projection. The window has a toolbar at the top with various text formatting options. The main area has a blue background with white text. The text content is: 'Discussion', 'Place: DSPPA', 'People should join:41Person', 'Start:2020Y11M18D 09:01', and 'End:2021Y03M19D 09:01'. At the bottom of the window are buttons for Clear, Load, OK, and Cancel.

Sign-in settings:

The sign-in function is designed to count the attendance of attendees. Complete the basic information required for the sign-in function before the meeting starts. After the meeting starts, click the “Start Sign-in” button on the “Sign-in Settings” interface to start the sign-in.

The screenshot shows the DSPConference software interface with the 'Sign in Setting' tab selected. The interface is divided into a left sidebar with navigation icons, a central workspace, and a right-hand settings panel. The settings panel includes sections for basic information, projector displayer settings, title settings, font settings, and total people who have got to. At the bottom, there are buttons for 'Add', 'Ament', 'Delete', 'Projecting review', 'Save', and 'Cancel'. A status bar at the very bottom indicates 'System Connected', 'Slave is not connected', and 'System Status:Speaking'.

Electronic Desktop Nameplate Setting:

The PC software can set the display content of the electronic desktop nameplate of the conference mic. Select the mic in the list of conference mics with electronic desktop nameplates as shown in the figure below, and then set the background color and text displayed on the mic, edit the corresponding text information, resolution, and layout, and finally click the button “Apply to all” to update and apply to the conference mics with electronic desktop nameplates.

A high-angle, top-down photograph of a person rappelling down a steep, light-brown rock face. The person is wearing a blue long-sleeved shirt, dark pants, and a white helmet. They are positioned in the upper left quadrant of the frame, with their body angled towards the cliff. A red rope is visible, extending from the top of the cliff down to the person. The cliff face is rugged and textured, with some small patches of green vegetation near the bottom. Below the cliff, the ocean is a deep, vibrant turquoise color, with white foam from breaking waves visible. The overall scene conveys a sense of adventure and perseverance.

DSPPA, Never Stop!
